PROFILE

Frontend Developer, UI Designer, and Computer Science student at the University of Lagos (UNILAG). I build clean, functional web experiences with React, JavaScript, and TypeScript, and enjoy bridging the gap between rough ideas and polished digital products. Available for freelance work.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C, HTML5, CSS3

Frameworks & Libraries: React, React Native, Node.js, Express, TailwindCSS, Three.js

Tools & Platforms: Vite, Expo, Git/GitHub, MongoDB, PostgreSQL, Google Cloud, Vercel

PROJECTS

EduGuard AI *React / AI Integration*

- Academic fraud detection platform for institutions, integrating AI-driven analysis into a React front end. (edu-guard-ai.vercel.app)

RCCG R63 Teens — Event Management System *Django / React / PostgreSQL*

- Full-stack, production event-management system with registration, ticketing, Paystack payments, QR check-ins, and approval workflows. (rccg-r63-juniorchurch.vercel.app)

WhatsApp Bot (Jesutobi) *Node.js / Express / MongoDB / Gemini AI*

- Multi-session WhatsApp bot with Gemini 2.5 AI integration, MongoDB-backed auth, an admin dashboard, and a crash-resilient Express architecture. (jesutobi-bot.onrender.com)

Recipe Book *JavaScript / REST API*

- Vanilla-JS recipe search engine that queries a public API to find meals instantly by name or ingredient. (divinefavourak.github.io/recipe-book)

EDUCATION

University of Lagos (UNILAG) *Lagos, Nigeria*

B.Sc. Computer Science, 200 Level — 2024 to Present

LEADERSHIP & COMMUNITY

Regional Teens President *Region 63 Junior Church, The Redeemed Christian Church of God (RCCG)*

- Oversee the spiritual development, pastoral care, and welfare of teenagers across the region — organising events and mentoring teen leaders.

National Teens Vice President *RCCG DTCE, Lagos Zone 5*

- Serve on the National Teens Board, driving zone-wide strategy, coordinating outreach initiatives, and supporting teen leadership programmes.

DEVELOPMENT JOURNEY

- 2025 — Freelance + Projects: shipped production apps, integrated AI, led client projects.
- 2024–Present — CS @ UNILAG: formal Computer Science education; algorithms & data structures.
- 2023 — React & Full Stack: picked up React and Node.js; started building real apps.
- 2022 — Deep dive into JavaScript: mastered ES6+ and DOM manipulation.
- 2021 — Started programming: first lines of HTML & CSS.
